

## **Mind Map Description**

The mind map illustrates a structured representation of the testing workflows for the Bewakoof website. It is divided into the following key sections:

### **1. Home Page Navigation**

This section focuses on testing the navigation functionality across the website:

- **Header**: Ensuring all header elements, such as navigation menus, are functional and responsive.
- **Product Categories**: Validating navigation to specific categories and verifying correct display of products.
- **Footer**: Testing footer links for About Us, Contact Us, Privacy Policy, and social media.

### **2. Product Functionality**

This section ensures the core product-related features are working seamlessly:

- **Search**: Testing the search bar to retrieve accurate and relevant product results.
- **Filters**: Verifying dynamic functionality of filters like size, color, and price.
- **Product Details**: Ensuring product descriptions, prices, images, and stock status are displayed correctly.

### **3. Cart**

The cart workflow tests shopping and checkout processes:

- **Items**: Ensuring items are displayed correctly in the cart.
- **Add to Cart**: Testing the addition of products to the cart and updating cart values.
- **Price and Quantity**: Validating that price calculations and quantity updates are accurate.
- **Checkout**: Ensuring users can proceed to checkout and complete the process without errors.
- **Remove from Cart**: Verifying smooth removal of products from the cart.

### **4. Contact Us Form**

This section ensures the contact form is functional:

- Testing the validation of required fields, error handling, and submission.

### **5. Wishlist Button**

This section tests the ability to add/remove products to/from the wishlist and ensures user feedback is provided for each action.

## 6. Responsiveness and Layout

This section focuses on the website's compatibility with different screen sizes and browsers:

- Verifying responsiveness and ensuring the layout is consistent across desktop, tablet, and mobile devices.

## Mind Map Access

For a visual representation of the testing workflows, refer to the mind map [here](#).

This detailed mind map ensures comprehensive testing coverage for all critical aspects of the Bewakoof website.
